Dear Researcher,

Thank you for reporting this to Microsoft responsibly we appreciate your effort in doing so.

Your submission was thoroughly reviewed and concluded as not a security vulnerability instead categorized as by design behavior due to the following reason.

"It is important to note that unlike a security feature or an implementation of Digital Rights Management (DRM), there is no guarantee that using SetWindowDisplayAffinity and GetWindowDisplayAffinity, and other necessary functions such as DwmlsCompositionEnabled, will strictly protect windowed content, for example where someone takes a photograph of the screen."

<https://learn.microsoft.com/en-us/windows/win32/api/winuser/nf-winuser-setwindowdisplayaffinity>

Having said, MSRC will proceed with the case closure.

Please continue your vulnerability research and help us protect our customers. Also, check out the Microsoft Bounty Program for your future research: <https://www.microsoft.com/en-us/msrc/bounty>

Thank you very much for working with us and we look forward to more submissions from you in the future!

Regards,
MSRC
